- Home Generators.
- Home Re-Wiring.
- Electrical Repairs.
- Data Cable Wiring Phone TV Satellite.
- Lighting.
- Residential Pools.
- Panel Upgrades.
- Service Upgrades.
- Surge Protection.

Benefits of Using Greenwave:

- On Time Every Time, or We Buy You Dinner!
- Professional Technicians.
- Up-Front Proposals.
- Shoe Covers for Floor Protection.
- Detailed Clean-up When We're Finished.

MARCH

The time for Spring Cleaning is quickly approaching! What does that mean for our electrical systems? It means that while we are organizing our closets and cleaning our baseboards, we should be sure to check our outlets and switches and ask ourselves these simple questions. Are there broken outlet covers or face plates? Does it smell like something is burning? Are there any unusual buzzing or crackling sounds? These are all indications that our electrical systems may need attention.

Are you considering upgrading your appliances? If you own an older home and are planning on upgrading to newer, larger appliances, an upgrade to your electrical system may be required.

SPRING SAFETY TIPS

- Keep electrical cords and equipment away from water
- Call 8-1-1 before digging to locate any utility lines on your property
- Keep all materials, tools and all body parts at least 15 feet away from power lines at all times
- Inspect all power tools and electric lawn mowers for frayed power cords before each use
- If you have electrical outlets in the garage, on the exterior of the house, or in any other location where water may be present, be sure they are ground fault circuit interrupter (GFCI) outlets
